A question of security

A workshop conducted by i3indya Technologies threw light on the modalities of ethical hacking

ARUN DANIEL YELLAMATY

DECCAN CHRONICLE

Ethical hacking is serious business these days. To cater to this increasing demand, certified courses are now being offered by many institutions.

Around 300 students from various colleges attended a workshop on 'Ethical Hacking and Cyber Security' that took place in J.B. Institute of Engineering and Technology, near Chilkur. It was organised by i3indya Technologies and students from across 20 colleges looking for a career in cyber security attended the event.

S. Yugandar, CSC student of AVR & SVR College, said, "I always wanted to learn what ethical hacking was all about, and after attending this workshop, I got to know how I can keep my system safe from hacking."

"Knowing about ethical hacking will help prevent ideas from being stolen when one takes up a job. It is also very important for us to be up to date with cyber security," opined Phanindra Kasyap of JBIT.

Sanskriti Mishra, a computer science student, learnt that hacking might not always be illegal. "It could be an interesting career. Hacking into others computer is illegal, but creating awareness that someone's system is not safe and alerting them is legal," she explained.

TECH

OoPpSs, the hacker

With the rising threat of cyber attacks and hackers finding new ways to compromise information security, IT managers have to make more effective and sophisticated policies. Here is an interview conducted by a group of teachers and students of DLDVMS Shalimar Bagh at i3indya Technologies, Preet Vihar with a 22-year-old Security Analyst and Researcher- Mr. OoPpSs who has been titled as 'Network and Admin Security Expert' by Ministry of IT, Punjab, 'Best Ethical Hacker' by IIS, Uttar Pradesh. He has assisted CBI officials, Delhi Police to solve their tedious Cyber Security cases, solved popular Cyber Crime cases, including IIT Bombay Alumni venture in just 12 hours! He has recently captured vulnerabilities in NIC Server, Google, Facebook etc.

HOW DID YOU ENTER THIS FIELD?

When I was in class X, my friend's e-mail ID was hacked. I asked my mother about it and she gave me an idea on hacking that fascinated me. Initially, I hacked for fun. Later, I started informing many big companies such as Google, Facebook etc about the technical loopholes in their websites. I have also solved the IIT Bombay Alumni e-mail hacking case.

HOW CAN WE GET INTO THIS FIELD?

You should learn some basic languages such as C, PHP etc. Besides, you can visit the site i3indya.com or accouncil.org to know more about several certified courses and degrees.

WHY IS IT THAT THE SUBJECT IS NOT POPULAR EVEN TODAY?

It is natural for parents to be sceptical as they always wish a safe and secure future for their children. Even my mother didn't approve when I chose this career. Lack of awareness about this field is responsible.

HOW DID YOU CHOOSE MR. OOPSSS AS YOUR NAME?

I got this name from the various error mes-

GAME OF THE DAY

CARGO BRIDGE: It tests your construction skills by designing a funky bridge with limited resources and then trying to get your cargo across safely. Start by watching the terrain where your bridge will be located. When it is

done click "Test your bridge." For each level, you have a limited budget. All money that you won't use, becomes your score, so cheaper bridge = higher score.
